VI Frequently Asked Questions FAQs

1 What is the accrual basis of accounting The accrual basis of accounting recognizes revenues when earned and expenses when incurred regardless of when cash changes hands This differs from the cash basis which recognizes revenues and expenses only when cash is received or paid

2 How do I calculate depreciation using the straightline method The straightline method calculates depreciation evenly over an assets useful life The formula is $\text{Asset Cost} - \text{Salvage Value} / \text{Useful Life}$

For example an asset costing 10000 with a 1000 salvage value and a 5year useful life would have annual depreciation of $(10000 - 1000) / 5 = 1800$

3 What is the difference between a debit and a credit Debits increase the balance of asset expense and dividend accounts while credits increase the balance of liability equity and revenue accounts The opposite is true for decreasing balances

4 How do I prepare a trial balance A trial balance is a summary of all general ledger accounts and their balances It lists all debit balances in one column and all credit balances in another The total debits should equal the total credits A trial balance helps identify potential errors in the general ledger

5 Where can I find additional resources for financial accounting Besides the textbook explore online resources like accounting websites YouTube tutorials and online courses

4 offered by platforms such as Coursera or edX Your college or university library likely also offers relevant textbooks and resources
